AMANI MULIRA

Data Analyst | Commercial & Enterprise Analytics | London, UK
amanimulira@gmail.com | +44 (0) 7731814161 | linkedin.com/in/amanimulira

PROFESSIONAL PROFILE

Data Analyst specialising in SQL-led commercial analysis, performance measurement and translating complex datasets into business decisions. Delivered end-to-end analytics across 22 contracts and £50m+ in annual cost activity, investigating profitability, workforce productivity and operational efficiency. Combines SQL, Python and Power BI with experience defining KPIs, evaluating investment opportunities and communicating recommendations to cross-functional stakeholders.

PROFESSIONAL EXPERIENCE

Wates Group | Finance Data Analyst | London | Aug 2025 – Present

- Owned end-to-end SQL-led reporting across **22** contracts and **£50m+** in annual cost activity, from data extraction and validation to KPI development and stakeholder delivery, contributing to a **15%** improvement in reporting visibility.
- Investigated commercial performance across **100+** Schedule of Rates codes, comparing workstream costs and values by contract and trade to identify profitable and unprofitable activities and focus attention on areas of margin pressure.
- Structured operative productivity analysis using timesheet and job data, examining productive versus unproductive time, time allocation and jobs completed per day to highlight workforce utilisation and performance differences.
- Independently wrote and optimised SQL to extract, join and reconcile data across financial and operational sources; partnered with Finance and Operations to resolve inconsistent definitions, contributing to **98%** data accuracy and **20%** fewer reporting discrepancies.
- Designed semantic models with **5m+** records and defined **30+** consistent KPIs spanning profitability, productivity, costs and forecast variance, enabling comparable performance reporting across contracts and workstreams.
- Evaluated **100,000+** invoice-processing records to compare automated and manual workflows; assessed throughput, accuracy, supplier-specific errors and manual interventions, translating findings into investment and process-improvement priorities.
- Presented actionable reporting to commercial and operational stakeholders, supporting variance investigation and performance reviews; streamlined validation processes, contributing to a **25%** reduction in manual review time.

National Information Technology Authority-Uganda | Data Analyst Intern | Kampala | Apr 2024 – Sep 2024

- Supported reporting and analysis for government digital initiatives, using SQL to extract and validate data and deliver insights to internal stakeholders.
- Assisted in developing and maintaining dashboards and reports to improve visibility of operational and programme metrics.
- Contributed to data cleaning, reconciliation and reporting-process documentation to improve consistency and reliability.

DotSavvy Africa | Data Analyst Intern | Jun 2023 – Aug 2023

- Analysed user behaviour using Google Analytics and Python, identifying UX improvements associated with a **25%** increase in session duration and page views.
- Built interactive dashboards and prototypes with Streamlit to communicate findings and support product and stakeholder decisions.
- Cleaned and prepared web analytics datasets and produced regular performance summaries for the team.

TECHNICAL SKILLS

Analytics & Programming: SQL, Python, Power BI, DAX, Excel, Google Analytics

Data Engineering & Modelling: dbt, Power Query, dimensional modelling, semantic modelling, data transformation, data validation

Commercial & Product Analytics: KPI development, profitability analysis, operational efficiency, user behaviour analysis, performance measurement

Governance & Collaboration: RLS, OLS, SharePoint, cross-functional stakeholder engagement

EDUCATION

University of Liverpool | MEng Computer Science (Artificial Intelligence) | 2025
