

AMANI MULIRA

DATA ANALYST

London, UK | +44 (0) 7731 814161 | amanimulira@gmail.com | linkedin.com/in/amanimulira | github.com/amanimulira | neoanalytica.co.uk

PROFESSIONAL PROFILE

Data Analyst with commercial experience transforming financial and operational data into reliable reporting, automated workflows and actionable insight. Skilled in SQL, Power BI, Python and Excel, with a record of reducing processing time by 30%, manual review effort by 25% and data discrepancies by 20%. Combines strong stakeholder communication with an MEng in Computer Science and Artificial Intelligence.

CORE SKILLS

Analytics: SQL, Python, Excel, exploratory analysis, variance analysis, root-cause analysis, forecasting and KPI design

Business Intelligence: Power BI, DAX, Power Query, Tableau, dashboard development, data visualisation and self-service reporting

Data Management: Data cleansing, transformation, reconciliation, dimensional modelling, ETL, validation and documentation

Business Partnership: Requirements gathering, stakeholder management, financial analysis, operational reporting and executive communication

PROFESSIONAL EXPERIENCE

Finance Data Analyst

Sep 2025 - Present

Wates Group | London, UK

- Automated recurring data extraction, transformation and validation workflows using SQL, Python, Excel and scheduled processes, reducing data-processing time by 30% and manual review effort by 25%.
- Developed Power BI dashboards covering financial and operational KPIs, improving stakeholder visibility into performance by 15% and enabling faster identification of emerging issues.
- Implemented automated data-quality, validation and reconciliation checks that improved reporting accuracy to 98% and reduced data discrepancies by 20%.
- Analysed financial and operational performance to identify trends, variances and root causes, translating findings into clear actions for Finance, IT and Operations stakeholders.
- Consolidated data from multiple business systems into trusted reporting datasets, reducing reliance on fragmented spreadsheets and improving consistency across recurring reports.
- Partnered with stakeholders to define reporting requirements, KPI logic and acceptance criteria, ensuring dashboards answered specific business questions rather than simply displaying data.
- Delivered ad-hoc analysis and executive-ready reporting to support budgeting, resource allocation, performance management and operational decision-making.

SELECTED ANALYTICS PROJECTS

D2C Marketing Performance Analytics

Technologies: SQL, dbt, DuckDB, Power BI, Shopify, Klaviyo, Meta Ads and GA4

- Built a unified marketing data model across four source platforms to analyse blended ROAS, marketing efficiency ratio, contribution-margin CAC, lifetime value, payback period and retention.
- Created 31 modular models and 137 automated tests, providing a consistent and auditable reporting layer for channel and cohort analysis.
- Designed decision-focused outputs highlighting the difference between reported channel performance and incremental commercial contribution.

Supply Chain Performance Analysis

Technologies: Python, SQL, Databricks, Spark, Power BI and LightGBM

- Developed a simulated analytics solution covering demand, inventory, stockouts, shipment delays and supplier risk.
- Applied forecasting and inventory calculations to identify potential lost sales, excess stock exposure and reorder requirements.
- Translated model outputs into business-facing KPIs and recommendations suitable for operational and senior leadership audiences.

EDUCATION

MEng Computer Science with Artificial Intelligence

2025

University of Liverpool | *Liverpool, UK*

Relevant study: Databases, data science, machine learning, artificial intelligence, statistics and software engineering.
