AMANI MULIRA

Commercial Data Analyst | SQL · Power BI · Python | Profitability, Cost & Performance Insight

London, UK | amanimulira@gmail.com | +44 (0) 7731814161 | linkedin.com/in/amanimulira

PROFESSIONAL PROFILE

Commercial Data Analyst who turns financial and operational data into margin, cost and productivity decisions. At Wates Group, owns end-to-end SQL and Power BI analytics across **22** contracts and **£50m+** in annual cost activity: identifying profitable and unprofitable work, investigating variance and building evidence for investment and process-improvement priorities. Track record of measurable outcomes, including **15%** better reporting visibility, **98%** data accuracy and **25%** less manual review time. Combines strong SQL, Python, Power BI/DAX and dbt with KPI design and clear, recommendation-led communication to Finance, Commercial and Operations stakeholders.

PROFESSIONAL EXPERIENCE

Finance Data Analyst | Wates Group

London | Aug 2025 – Present

- **Surfaced margin pressure across 100+ Schedule of Rates codes**, pinpointing profitable and unprofitable activities by comparing workstream costs and values by contract and trade, so commercial teams could focus attention where margin was at risk.
- **Delivered a 15% improvement in reporting visibility across 22 contracts and £50m+ in annual cost activity** by owning SQL-led reporting end to end, from data extraction and validation to KPI development and stakeholder delivery.
- **Shaped investment and process-improvement priorities** by evaluating **100,000+** invoice-processing records, comparing automated and manual workflows on throughput, accuracy, supplier-specific errors and manual interventions.
- **Exposed workforce utilisation and performance gaps** by structuring operative productivity analysis from timesheet and job data, covering productive versus unproductive time, time allocation and jobs completed per day.
- **Achieved 98% data accuracy and 20% fewer reporting discrepancies** by writing and optimising SQL to extract, join and reconcile financial and operational sources, and partnering with Finance and Operations to resolve inconsistent definitions.
- **Enabled like-for-like performance comparison across contracts and workstreams** by designing Power BI semantic models with **5m+** records and defining **30+** consistent KPIs spanning profitability, productivity, costs and forecast variance.
- **Cut manual review time by 25%** by streamlining validation processes, and presented actionable reporting to commercial and operational stakeholders to support variance investigation and performance reviews.

Data Analyst Intern | National Information Technology Authority-Uganda

Kampala | Apr 2024 – Sep 2024

- **Delivered validated insight on government digital initiatives** to internal stakeholders, using SQL to extract and validate data for reporting and analysis.
- **Improved visibility of operational and programme metrics** by helping develop and maintain dashboards and reports.
- **Strengthened reporting consistency and reliability** through data cleaning, reconciliation and reporting-process documentation.

Data Analyst Intern | DotSavvy Africa

Jun 2023 – Aug 2023

- **Identified UX improvements associated with a 25% increase in session duration and page views** by analysing user behaviour with Google Analytics and Python.
- **Supported product and stakeholder decisions** by building interactive Streamlit dashboards and prototypes, and produced regular performance summaries from cleaned web analytics datasets.

SKILLS

Commercial Analysis: Profitability and margin analysis, cost analysis, variance investigation, forecast variance, KPI development, performance measurement, operational efficiency, workforce productivity, investment and process-improvement analysis

Technical: SQL (query writing and optimisation), Power BI, DAX, Power Query, Python, dbt, Excel, Google Analytics, Streamlit

Data Modelling & Quality: Semantic and dimensional modelling, data transformation, data validation and reconciliation, RLS/OLS governance, SharePoint

Stakeholder Skills: Translating analysis into recommendations; cross-functional partnering with Finance, Commercial and Operations; performance reviews

EDUCATION

MEng Computer Science (Artificial Intelligence) | University of Liverpool | 2025
