

AMANI MULIRA

ANALYTICS ENGINEER | JUNIOR DATA ENGINEER

London, UK | +44 (0) 7731 814161 | amanimulira@gmail.com | linkedin.com/in/amanimulira | github.com/amanimulira | neoanalytica.co.uk

PROFESSIONAL PROFILE

Analytics engineering and data professional with commercial experience automating financial and operational workflows, developing trusted reporting datasets and improving data quality. Skilled in SQL, Python, dbt, Airflow, Databricks, Spark, Docker and Power BI, with portfolio evidence including 31 dbt models, 137 automated tests and a complete local build in under 60 seconds.

TECHNICAL SKILLS

Languages and Modelling: SQL, Python, Bash, dbt, PySpark, Pandas, dimensional modelling, star schemas and ETL/ELT

Platforms: Databricks, Snowflake, PostgreSQL, SQL Server, DuckDB, Delta Lake and Azure

Orchestration and Delivery: Apache Airflow, Databricks Workflows, Docker, Git, GitHub Actions, CI/CD and Terraform

Quality and BI: Automated testing, reconciliation, validation, documentation, lineage, Power BI, Tableau and Databricks SQL

PROFESSIONAL EXPERIENCE

Finance Data Analyst

Sep 2025 - Present

Wates Group | *London, UK*

- Developed automated workflows using SQL, Python, Airflow and Docker, reducing recurring data-processing time by 30% and manual review effort by 25%.
- Built reusable reporting datasets and transformation logic supporting Power BI dashboards across Finance and Operations.
- Implemented validation and reconciliation controls that improved reporting accuracy to 98% and reduced data discrepancies by 20%.
- Integrated multiple financial and operational sources into standardised reporting structures, improving consistency and reducing spreadsheet dependency.
- Defined data requirements, transformation rules, KPI logic and acceptance criteria with Finance, IT and Operations stakeholders.
- Documented data sources and transformation processes to improve maintainability, auditability and knowledge transfer.

SELECTED TECHNICAL PROJECTS

D2C Analytics Engineering Platform

Technologies: *dbt, SQL, DuckDB, Snowflake, Python, Power BI and GitHub Actions*

- Integrated Shopify, Klaviyo, Meta Ads and GA4 data into tested staging, intermediate and mart layers.
- Developed 31 dbt models and 137 automated tests supporting ROAS, contribution-margin CAC, lifetime value, payback period and retention analysis.
- Designed dimensional marts with a complete local build under 60 seconds and portability from DuckDB to Snowflake.

Supply Chain Lakehouse

Technologies: *Databricks, PySpark, Delta Lake, MLflow, LightGBM and Structured Streaming*

- Designed a Bronze, Silver and Gold Medallion Architecture for inventory, orders, shipments, suppliers and demand data.
- Developed stockout, safety-stock and supplier-risk transformations plus a global LightGBM forecasting workflow tracked in MLflow.

AML Transaction Monitoring Platform

Technologies: *Databricks, Spark, GraphFrames, MLflow, scikit-learn and GraphSAGE*

- Analysed approximately 203,000 cryptocurrency transactions using tabular and graph-based modelling.
- Built Spark feature-engineering, scoring and alert workflows; evaluated model drift and designed traceable evidence outputs.

EDUCATION

MEng Computer Science with Artificial Intelligence - University of Liverpool

2025
